Station Hospet, , *Dated the* 2nd November 19 30.

From (Name) Dr. R. Nagan Gowda Ph.D.,
(Designation) Chairman, Municipal Council,
Hospet.

To The Secretary to the Government of Madras,
Local Self Government Department.

Sir,

In reply to G.O. No. Ms 1900 P.H. dated 1-8-30, I have the honour to state that the Health Officer has reported himself to duty on 16-10-30 and is looking after the health of the Town devoting special attention towards Anti-malarial measures. I therefore request the Government to kindly address the Public Works Department to proceed on with the removal of rank - vegitation and to clear out the banks of the Roya Channel for which sufficient funds have already been alloted.

I have the honour to be,
Sir,
Your most obedient servant,

Vice-Chairman, M.C.

(Designation) Ag. Director of Public Health, Madras.

To The Secretary to the Government of Madras,
Local Self-Government (Public Health) Department.

Sir,

Reference: Government Memorandum No.55288-1 E.1 P.H. dated 7th January 1931.

I have the honour to forward herewith a copy of the Health Officer's report on antimalarial works in Hospet municipality. As it is seen from the report that the Chairman has undertaken active antimalarial work, the Government may now be pleased to issue orders to utilise the sanctioned allotment for the clearance of rank weeds and other growths in Roya channel and its branches.

I have the honour to be,
Sir,
Your most obedient servant,

Copy of letter No.M.C.R.36 dated 22-1-31 from the Municipal Health Officer, Hospet.

Subject: Antimalarial operations in Hospet municipality.

Soon after my taking charge of Hospet municipality, cholera broke out and much of my time has been taken up for combating the disease, which lasted till 3-1-31. One maistry with a band of 5 coolies were entertained for antimalarial work. Till recently, the work consisted in cutting prickly pear along road margins and near dwelling houses and in filling the pits with them. As the work was not quite satisfactory, and cutting of prickly pear has no bearing whatsoever with antimalarial operations except that the prickly pear cut is used as material for filling up pits. The staff has been reduced temporarily to 3 coolies since the appointment of a Sanitary Inspector to be in charge of epidemics, malaria, plague, cholera etc. which was effected about the middle of December 1930. So far 11 pits near canal road in Victoriapet, 3 near slaughter house, 2 in Amaravathi road, 2 in Narayanakeri road have been filled up. Some of the pits near Roya channel on the eastern side of the railway feeder rodd have been used to store rubbish, and no purchaser came forward to take it when it was auctioned and thus those pits have been closed up temporarily at least. The Chairman intends to spend the amount realised by the sale of rubbish for filling up of pits from an economical point of view as we could get two or three cart loads for the cost of one cart load of rubbish.

As regards oiling stagnant sheets of water it is being done regularly and systematically. Since my arrival nearly 90 gallons of"pesterine" have been used up for the purpose. A sprayer, ("Four oaks' Kent' pattern, two gallon capacity) has been recently purchased.

Larvicidal fish could not be introduced into the wells as they were chlorinated on account of the prevalence of cholera. Arrangements have been made to get the fish from Bellary and the Inspector will be sent there within a week and this part of the work will be taken up immediately. Quinine distribution is in progress. A number of notices were served on private individuals to close the pits within their premises without any tangible result and I have

requested

requested the Chairman for orders of prosecution for the non-compliance of the notices issued. Permissions for construction within the malarial zone are refused. Notices are being served on the parties who have put up sheds in Municipal lands lying in the malarial zone for their removal giving one month's time.
